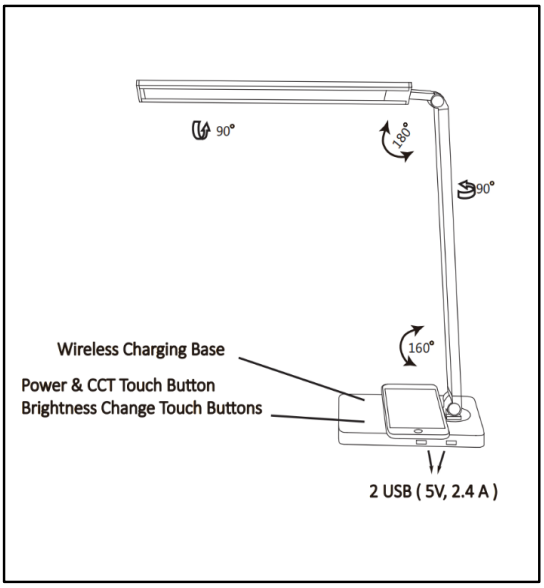
B	12V 3A Adapter	1

PRODUCT OVERVIEW



POSITIONING YOUR LAMP

Your lamp features an adjustable head and lamp arm. The arm connecting the lamp's head and base also features articulating joints, which allow top lamp to fold within 180 degree and lower support within 90 degree with 90 degree twist function.

USING YOUR LAMP FOR THE FIRST TIME

The first time you use your LED Desk Lamp, connect the DC plug to the DC socket on the lamp's base and connect the power adapter to the wall socket.
Once the adapter has been connected, tap the Power Touch Button to turn the lamp ON or OFF, and press the brightness change touch button to raise or dim the lamp's brightness respectively (8 levels). Also press Color area for 4 color change temperature (3000K/3500K /4200K/5000K).

CHARGING YOUR DEVICES

1. Once your lamp is connected to a power source, the lamp is ready to charge cellphones. Please connect it with your own USB cable and insert it into a USB outlet (DC5V, 2.4A).
2. Simply place your cellphone on the lamp's base against lamp support stem. The cellphone will begin to charge automatically.

Note: charging speeds may be affected by the location of your phone's Qi standard induction coils and the power source. The wireless charger cannot be used to power devices with metallic cases or cases thicker than 3mm
Ready for iPhone X, iPhone 8 Plus, iPhone 8 and more! iPhone is a trademark of Apple Inc., registered in the U.S and other countries.
